

HARTFORD, Conn., Feb. 2.—Mrs. Lolita S. Armour, wife of J. Ogden Armour of Chicago, is defendant in a suit returned to the Superior Court in this city to-day. Property owned by Mrs. Armour in Suffolk field, this county, where she was born, has been attached for \$5,000. The plaintiff is Dr. M. M. Johnson of this city, who charges that Mrs. Armour agreed to pay him for treatment of her sister, Mrs. Carrie Neal of Southington, wife of Stephen D. Neal, a manufacturer of that town. Mrs. Neal had nervous prostration and was operated on for appendicitis. Dr. Johnson demanded \$4,500, which Mrs. Armour refused to pay on the ground that the charge was excessive.

Minister Buchanan's Wife Here.
Mrs. William I. Buchanan, wife of the United States Minister to Panama, and her son Donald arrived from Panama yesterday on the Yucatan. Minister Buchanan will join his family here next Tuesday.

Ginton Strick, both of New York. The bridegroom, a director of the American Tobacco Company, is well known in business circles. The ceremony was performed by Bishop Charles E. Cheney at his residence, 2409 Michigan avenue. The bride was given away by her brother, Charles H. Stevens. Only immediate relatives were present.

For New England, snow to-day; to-morrow fair; continued cold.

**brains
are made**

"BRAIN - FAG."

CLOSE mental concentration rapidly consumes the gray matter in certain Nerve cells. More nourishment is therefore needed to support that sort of brain-work than to support twice as much of a diffused and varied kind.

Nearly all great successes have been achieved through intense Concentration, which is like the "Burning Glass," that focuses sunlight so hotly on a single spot as to set wood aflame.

The ability to Concentrate is reckoned equivalent having twice as much Brain power of non-concentrating quality.

Ambitious people are therefore the greatest sufferers from "Brain-fag," which is exhaustion of reserve matter in certain Nerve Cells, frequently due to concentration.

When that reserve of gray matter is gone—the able power of concentration is lost, and only the elements in food can quickly restore it.

These elements are Phosphate of Potash and iron, which are contained in the outer coats of wheat.

But,—the Miller carefully sifts out these dark parts in grinding Flour.

The outer coats are too fibrous to crush into fine Flour, and so dark in color as to prevent its sale to people who want white flour merely because it looks nice.

It differs from all other Wheat foods in color and nutritive quality.

Ground down, instead of white, or creamy, like other Wheat contains all of the dark colored Bran-coats, in their phosphates.

It is whiter than any other Wheat preparation because it is contains a high per cent. of the mineral elements and Nerve tissue.

It is heavier and darker, a Government Analysis shows it is seven times more digestible than Oatmeal, and three times as good for assimilation as the average Wheat food.

It contains the best Brain and Nerve materials, and is the best for the Liver Stage, so that the imperfect stomach of a child can get all the nutrition out of it.

It repairs "Brain-fag" and is the correct food for all strenuous Brain-workers.
